

Timber densitometer_AS-120DEN

describe

Wood densitometer is used to measure the density of wood. It is an indentation densitometer.

characteristics

- * Adopt computer technology, digital filter technology and other advanced technology, can accurately measure The density of the material.
- * Automatic indication when the battery voltage is lower than the specified value.
- * Digital display, ignoring the difference.
- * Using the optional RS232C software and cable, can communicate with the PC computer, to achieve digital Data collection, processing, analysis and printing functions.
- * With automatic shutdown function, save electricity.

parameter

Show indicator	4-bit 10 mm liquid crystal
Test range	0.01g/cm ³ ~1.2g/cm ³
Points and distinguishing rate	0.01g/cm ³
Accuracy of measurement	≤ ±0.01g/cm ³
Electrical source	2 size 7 batteries
Speaking for the parts	Temperature 0°C~50°C, humidity <80%
size	162mmx65mmx27 mm
Heavy volume	170 g (battery not included)
Standards attached	1 portable case
	1 copy of instruction manual
	Calibration block 1 piece
Optional attached parts	RS232C communication cable and software
